

PROJECT PROPOSAL

MyBot App

Problem Description:

Have you ever thought of taking help from a robot 🤖?

You may encounter in your life routine tasks that may seem boring to humans, but they are necessary and require accuracy and patience and take time and effort, such as taking attendance assessments on your event, or even serving coffee at parties or large meetings, or even you may need a babysitter when you are busy. So, we created in our app the ability to ask for help a smart bot using artificial intelligence. Where robots are more accurate and effective in results and serve you greatly and accurately in practical life.

i Application Description:

- ⊕ The application provides a wide range of services such as:

Survey robot: this robot is designed to evaluate your services by your customers using voice chats with them and interaction through robotic arms.

Robotic vacuum cleaner: this robot can tackle multi surfaces and comes with a variety of different cleaning modes giving you options of sweeping, vacuuming and mopping damp or wet floors. included manual operation via remote control and a "self-drive" mode which allowed the machine to clean autonomously without human control.

Robotic child monitoring: this robot can take action to warn and possibly protect the child from danger. Moreover, its autonomous learning engine helps it remember preferences and interests and builds on them to improve the "conversation." It will be your child's best friend.

Coffee serving robot: this robot serve coffee to your guests and customers in the most modern way they can see through the coffee robot, with the ability to modify the shape of the robot to suit your identity.

- ⊕ The application allows you to choose a design with the ability to select a color.
- ⊕ The application allows you to write any text on it.
- ⊕ The application allows you to rent the robot for a period or you could buy it.
